PROFILE SUMMARY

Developer with almost 15 years of experience working with different technologies (over 2 years frontend) looking for a role as a mid/senior developer. Motivated, with willingness to learn new technologies and skills. Good team worker. Open to a B2B or an employment contract, remote work. Due to personal reasons a 4 day working week is preferred. Currently on a B2B contract, with a 14 days notice period.

EXPERIENCE

07/2020 - PRESENT   SENIOR DEVELOPER AT CAPCO POLAND SP. Z O.O.

Project: Back-office application for HSBC

Responsibilities: Development of a fronted, banking applications for back-office employees.

Technologies: React, Redux Toolkit, React Router, React Testing Library, Material UI, JavaScript, TypeScript, SASS, CSS, HTML

07/2020 - PRESENT   PERSONAL FRONTED DEVELOPMENT MASTERY PATH

Project: Personal frontend projects

Responsibilities: To show some of my work I've built several sites that are available on my portfolio page. This is because what I normally do is not publicly available. They have live versions, and links to the source code, so feel free to take a look.
First are from the time when I started working with React. Recent ones are based on Figma design files from *frontendmentor.io* (using ready designs allowed me to focus more on the implementation side of things).

Technologies: React, Redux Toolkit, React Router, React Query, React Testing Library, JavaScript, TypeScript, CSS, SASS, HTML, Material UI, Vite, Parcel

06/2017 - 07/2020   SENIOR DEVELOPER AT CAPCO POLAND SP. Z O.O.

Project: New internet banking for BNP Paribas Polska

Responsibilities: Building migration engines for Identity Management System and Payments
Implementation of micro-services in the area of system administration, payments

Technologies: Oracle SQL, Java, Spring Boot, Hibernate, JMeter

11/2015 - 02/2017   CONSULTANT AT ACCENTURE SP. Z O.O.

Project: Building a new Digital Bank in France for La Banque Postale based on mBank.

Responsibilities: Designing an architecture of payments and cards for the new bank using a fit-gap approach.

Technologies: APIs, UML, software architecture

SEE MY PORTFOLIO

aj-cv.vercel.app/portfolio
